

Mission

- We provide professional development courses to engineers and scientists so that companies can benefit from their increased productivity and knowledge base

Training Philosophy

- Courses provide practical insight with the right amount of theoretical fundamentals
- Training offered by engineers for engineers, either as open courses or in-house

Technical Courses

- Principles and practice of leaching
- Solvent extraction and electro-winning
- Process modelling
- Principles and practice of biohydrometallurgy
- Flotation and milling

Non-Technical Courses

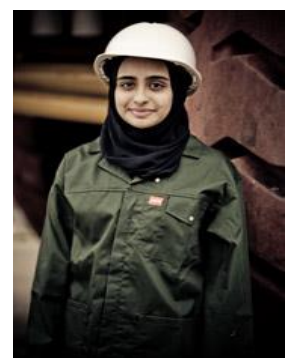

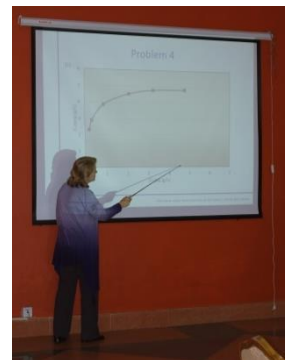

- Finance for Engineers
- Effective technical report writing for engineering professionals
- Technical presentation skills for scientists and engineers
- Professional development programme for women engineers

On-site training of metallurgists

- On-site training exercises around major pieces of equipment with assignments to dramatically improve performance
- Exercises included studying all aspects of equipment, analysing the problem, developing models to test proposed solutions, running sampling campaigns and implementing a solution

Accreditation

- Courses accredited by the Engineering Council of South Africa
- CM Solutions has courses to help engineers collect CPD points in different categories, in order to maintain their registration

Since 2002 CM Solutions has trained over 1,000 engineers for clients including: Anglo American, Lonmin, Anglo Gold Ashanti, TWP, Impala Platinum, Metorex, Rand Refineries, Hatch, Logiman, ENRC, AEL, Ruashi, Mintek, Bateman, WorleyParsons, Mintek, Bateman and Chambishi Metals
